ABOUT ME

Final-year Computer Science and Engineering student at the University of Beira Interior, with a strong interest in Software Development, Operating Systems, and low-level programming. Throughout my academic journey, I have developed a deep motivation for these fields, consistently seeking to expand my knowledge beyond the classroom. I am currently looking for opportunities to apply my technical rigor to real-world challenges, accelerate my career in a global environment, and gain the hands-on experience necessary to excel in the industry.

Bachelor's in Computer Engineering | September 2023 – June 2026 (Expected)

Universidade da Beira Interior

Average grade: 15.2

- Relevant Coursework: Operating Systems, Programming in C, Functional Programming, Computer Architecture, Algorithms and Data Structures, Theory of Computation, Software Engineering, Object-Oriented Programming, Embedded Systems (In Progress).

PROJECTS

Process Scheduler

Developed for the Operating Systems course | **GitHub:** [Brunocor26/SO_ProbSched](#)

- Project Description: Process Management Simulator
- Development of a low-level process management simulator in OCaml, ensuring logical correctness and high performance.
- Implementation of scheduling algorithms (Round Robin, Probabilistic) with data analysis support via CSV.
- Multi-language integration: OCaml simulation engine, Bash automation scripts, and Python visualization interface.
- Key Takeaway: Mastery of critical OS concepts (CPU management, process states, and concurrency).

Hard skills

Tools: Git, Linux/Bash and Jira

Programming languages: C, Python, OCaml, Java, C++ and Assembly

Web development: HTML, CSS, JavaScript

English Level: B1

Soft Skills

- Problem Solving
- Teamwork and Collaboration
- Continuous Learning / Commitment to Continuous Improvement
- Result and Performance Oriented
- Leadership and Project Management Skills

RELEVANT EXPERIENCE

Academic tutor for First-Year Students support | UBI Learning Hub II

2024-2026

Selected as a Peer Tutor to support first-year students in programming (C/Python) and mathematics, demonstrating strong technical proficiency and effective knowledge transfer.

Volunteering at Refood Covilhã

2023-Now

Developed as a constructive way to utilize time, fostering skills such as teamwork and interpersonal communication. Beyond these gains, it provided a strong sense of mission and commitment, resulting in a positive impact at both personal and academic levels.
